

HARBOR POINT LOGISTICS CENTER

Synthetic Offering Memorandum

Dallas, Texas | Industrial / Logistics

TEST PURPOSE

This document is entirely fictional and was created specifically to test Mini-Anchor Phase 10A OM ingestion, provenance, conflict handling, missing-field behavior, and analyst review.

SYNTHETIC TEST DOCUMENT - NOT CONFIDENTIAL - NO REAL PROPERTY OR
SELLER

Executive Summary

Harbor Point Logistics Center is a fictional single-asset logistics investment opportunity created solely for software testing. The following seller-reported figures are presented as document facts and should not be interpreted as buyer underwriting assumptions.

Document Fact	Seller-Reported Value
Property Name	Harbor Point Logistics Center
Address	1450 Anchor Commerce Way, Dallas, Texas 75247 (synthetic)
Property Type	Industrial / Logistics
Building Area	412,000 SF
Year Built	2018
Offering Price	\$45,000,000
Current NOI	\$2,500,000
Current Occupancy	95.0%

Seller statement: The offering price is \$45.0 million. Seller-reported current net operating income is \$2.50 million. The marketing summary reports 95.0% current occupancy.

Buyer underwriting assumptions such as NOI growth, hold period, exit capitalization rate, leverage, interest rate, and amortization are not provided by the seller in this offering memorandum.

Investment Highlights

The highlights below are narrative seller-marketing statements. They are included to test semantic extraction of contextual information without expanding Mini-Anchor's nine underwriting inputs.

- **Modern logistics configuration.** The building was completed in 2018 and is configured for distribution-oriented industrial use.
- **Large-format footprint.** The property contains approximately 412,000 square feet of building area on a single site.
- **Dallas location.** The fictional asset is presented as being located in Dallas, Texas, near major transportation corridors.
- **Seller-reported income.** Current NOI is stated directly elsewhere in this memorandum rather than requiring the reader to derive it from component line items.
- **Analyst assumptions intentionally omitted.** The seller does not provide a buyer hold period, exit cap rate, financing structure, or forecast NOI growth rate.

Important for testing: statements in this section should be treated as read-only deal context or narrative evidence. They should not cause Mini-Anchor to invent unsupported underwriting assumptions.

Property Overview

Property Attribute	Reported Detail
Property Name	Harbor Point Logistics Center
Street Address	1450 Anchor Commerce Way, Dallas, Texas 75247 (synthetic)
Property Type	Industrial / Logistics
Building Area	412,000 SF
Year Built	2018
Site Area	28.4 acres
Clear Height	32 feet
Dock-High Doors	74
Drive-In Doors	4
Parking	268 vehicle spaces

The property facts above are synthetic and may be used as deal-orientation context. Only the fixed Phase 10A context fields should be promoted into the read-only context area.

Seller-Reported Financial Snapshot

The seller presents the following current operating snapshot. The Current NOI line is explicitly stated and should be treated as the authoritative document statement for Mini-Anchor's current_noi candidate. Mini-Anchor should not need to calculate NOI from the other rows.

Current Operating Item	Amount
Base Rent and Reimbursements	\$3,250,000
Other Property Income	\$200,000
Effective Property Revenue	\$3,450,000
Operating Expenses	\$950,000
Seller-Reported Current NOI	\$2,500,000

Current NOI: \$2,500,000

No forecast growth rate is stated in this financial snapshot. Any NOI growth assumption used in underwriting must be entered by the analyst.

Leasing and Occupancy

This page intentionally contains a seller-reported figure that conflicts with the marketing summary on Page 2. The conflict is included to test Mini-Anchor's conflict-surfacing behavior.

Leasing Metric	Reported Value
Current Occupancy	94.0%
Vacant Area	Seller schedule indicates a small amount of currently vacant space
Lease Detail	Detailed lease-by-lease information is outside the scope of this synthetic OM

Current Occupancy: 94.0%

The seller has not reconciled the occupancy figure on this page with the 95.0% occupancy figure shown in the Executive Summary. An analyst should review the discrepancy rather than allowing either figure to silently override the other.

Transaction Notes

The seller is marketing the property at an offering price of **\$45,000,000**. This amount is repeated here intentionally so a grounded extraction system can find consistent evidence across more than one page.

Underwriting Item	Seller Disclosure
Purchase Price / Offering Price	\$45,000,000
NOI Growth Assumption	Not provided - buyer to underwrite
Hold Period	Not provided - buyer to determine
Exit Cap Rate	Not provided - buyer to underwrite
Loan-to-Value (LTV)	Not provided - buyer to source financing
Interest Rate	Not provided - buyer to source financing
Amortization	Not provided - buyer to source financing

These omissions are deliberate. Mini-Anchor should leave unsupported underwriting fields missing rather than infer values from market convention or from other fields.

Diligence Notes and Synthetic Test Disclaimer

This offering memorandum is a synthetic acceptance-test document created for Mini-Anchor Phase 10A. It does not describe a real property, seller, tenant, broker, financing source, or transaction.

The document is designed to test whether the ingestion pipeline can:

- extract explicit document facts from paragraphs and tables;
- retain page-level and anchor-level provenance;
- surface a genuine conflict instead of silently choosing a value;
- leave analyst-driven underwriting assumptions missing when the OM does not support them;
- carry a small fixed set of read-only deal-context facts;
- allow the analyst to approve, edit, or reject proposals before values pre-fill the existing underwriting form.

This file is intentionally non-confidential and may be sent to Azure Document Intelligence and OpenAI for development testing.

Prepared solely for software testing on August 27, 2026.
